git mv

```
(ABPR) > /tmp/ossf site:(master) mv index.html index.rb
```

```
(ABPR) > /tmp/ossf site:(master)
```

```
user (EMBPR) # /tmp/ossf git:(master) git commit --amend [11:05]
[master 564973c] Welcome to Facebook bug
1 file changed, 1 insertion(+)
user (EMBPR) # /tmp/ossf git:(master) git l [11:06]
• 564973c (72 seconds) <Eddie Koo> HEAD, master Welcome to Facebook bug
• 619e492 (7 minutes) <Eddie Koo> change index.rb content
• e8fabba (9 minutes) <Eddie Koo> first commit
user (EMBPR) # /tmp/ossf git:(master) [11:06]
```

```
git commit --amend
```

## Exercise:

in last commit, you forgot to add another file,  
but you don't want to commit again just for  
this single file, please try to commit it with `--  
amend`.

if you still want to commit an empty folder,  
you can put an empty `“.gitkeep”` file in it by  
convention.

git log

```
git log --pretty=oneline
```

```
git log --pretty=format:"%h %s"
```

```
git help log
```

git rm

git tag

git branch

```
user (EMBPR) $ /tmp/ossf git:(master) git br
```

[11:27]

```
• master
```

```
ossf
```

```
user (EMBPR) $ /tmp/ossf git:(master) git checkout ossf
```

[11:27]

```
Switched to branch 'ossf'
```

```
user (EMBPR) $ /tmp/ossf git:(ossf) git co master
```

[11:28]

```
Switched to branch 'master'
```

```
user (EMBPR) $ /tmp/ossf git:(master) git br -D ossf
```

[11:29]

## Exercise:

1. create a new branch name **"fruit"**
2. checkout to "fruit" branch
3. add a **"banana.rb"** and commit it

git merge

## Exercise:

1. checkout back to "master" branch
2. merge "fruit" to "master"
3. remove "fruit" branch if you like

`git pull = git fetch + git merge`
